CAREER OBJECTIVE

Computer Science undergraduate with experience in AI systems and full-stack development in Python, Node.js, Express, MongoDB, and Flask. Currently working as an AI Data Engineer Intern at ProductSquads, gaining hands-on experience in Retrieval-Augmented Generation (RAG), agentic workflows, and LLM-based applications. Sound knowledge in data structures, REST APIs, and database concepts.

TECHNICAL SKILLS

Programming Languages: Java, Python, C

Backend Technologies: Node.js, Express.js, Flask, FastAPI

Databases: MySQL, MongoDB, SQLite

Web Technologies: HTML5, CSS3, JavaScript, React.js

AI/ML: RAG, LLMs, Embeddings, Vector Databases, Agentic Systems, LangGraph, MCP

Core CS Concepts: OOP, Data Structures, DBMS, Operating Systems, Computer Networks

Tools & Platforms: Git, GitHub, VS Code, Postman

EXPERIENCE

AI Data Engineer Intern | *ProductSquads, Hyderabad, India*

- Working on building AI-powered systems using RAG pipelines and LLM-based architectures
- Designing and implementing agentic workflows for intelligent automation
- Integrating vector databases and embeddings for semantic search and contextual retrieval
- Developing backend APIs to support AI-driven applications

PROJECTS

University Policy AI Assistant – Hybrid RAG System | *Python, FastAPI, ChromaDB, BM25*

- Built a hybrid RAG system combining vector search, BM25 keyword retrieval, and cross-encoder re-ranking
- Implemented Graph-RAG using a knowledge graph for improved contextual understanding
- Designed an end-to-end pipeline including retrieval, re-ranking, generation, caching, and history tracking
- Developed profile-aware caching using SQLite for low-latency responses
- Integrated OCR-based PDF ingestion for handling scanned documents

Finexy – Multi-Agent AI Financial Advisory System | *Python, LangGraph, MCP*

- Developed a multi-agent AI system with agents for reasoning, planning, and evaluation
- Implemented MCP-based tool execution for dynamic workflows and financial computations
- Built hybrid retrieval combining vector, keyword, and knowledge graph approaches
- Enabled use cases like loan eligibility, EMI calculation, and bank comparison
- Designed system with secure data handling and scalable architecture

Dev Connect – Developer Networking Platform | *MongoDB, Express.js, React.js, Node.js*

- Built a developer networking platform to connect, collaborate, and share profiles
- Implemented features like user authentication, profile creation, connection requests, and feeds
- Designed and integrated REST APIs for managing user data and interactions
- Developed responsive frontend using React for seamless user experience

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science Engineering | *Parul University, Vadodara, Gujarat*
September 2023 – Present

CERTIFICATIONS

- **AI Fundamentals** – IBM SkillsBuild & Cisco Networking Academy
- **AWS Academy Cloud Foundations**
- **Computer Networks & Internet Protocol (Elite)** – NPTEL, IIT Kharagpur
- **Generative AI** – PW SkillsBuild & Microsoft

SOFT SKILLS

Problem Solving, Analytical Thinking, Team Collaboration & Communication, Time Management, Adaptability & Quick Learning, Ownership Mindset
